KEY FEATURES

- Playful by nature**
- Durable finishes**
- Sturdy construction**

POP FLIP TOP TABLE

Pop fliptop table is a playful, mobile, robust option for changing work environments.

The table's sturdy construction is supported through layering the support columns: an inner tube holding the leg, and an outer sleeve which slips over it. An almost invisible power plug set within the base of the column enables the user to seamlessly 'plug and play', for connectivity on the go.

Set on lockable castors with a slender frame, the table's flip top with ABS edge delivers durability and increased strength.
