## ALLU / CHAIR, Paola Navone

Able to fit into any environment, from domestic to contract, Allu is characterised by clean lines and geometric and essential shapes, and is available in two variants: chair and armchair with armrests. Tubular aluminium frame with visible joints which are typical of handmade anodised aluminium products. Neutral chemical finishing. Seat and back handwoven with 6 mm rawhide strips, natural (ALLU 23 I – 24 I) or grey (ALLU 223 I – 224 I) colour, riveted on the frame. Rawhide is a material obtained from the cow and its tension can change with time, especially in relation with humidity and change of temperature. This material is slightly stained (wax finish). Black polyethylene feet.
