

Aluminium Bed

Designer	Bruno Fattorini
Year	1997

Rigour of forms obtained through the lens of simplicity, yet paired with a strong expressive force: this defines the Aluminium Bed designed by Bruno Fattorini.

A bed made of aluminum, a lightweight and versatile material that gives a distinctly contemporary feel to the piece. It is also available in a romantic version with a sommier with canopy, or with a high headboard measuring 65 cm.

The lacquered version is particularly current, in painted aluminium in black, white and red, in matt or glossy versions, suitable for modern and evolving sleeping areas.

Frame

In natural anodised aluminium or with a matt or glossy painted finish.

Sizes

Width range from one meter to 210 cm, with a fixed length of 210 cm.

Maximum available length 220 cm (slats usable length 210 cm).

Notes

Orthopedic slat bases and mattresses available, not included.
