BRASS / TABLE, Paola Navone

The eclectic spirit of Gervasoni can clearly be seen in the BRASS family of coffee tables, characterised by a sculptural look and feel. They are made with the base in cast iron, a column in ebony-stained beech, and a top available in pearl color concrete, cast aluminium or polished brass. The Brass 147 model is not available with a polished cast aluminium or polished brass top, but only in pearl color concrete..

To reach the maximum brass luminosity, the tops are left untreated. The surface is therefore easily scratched. However, these scratches can be easily removed by using specific cleaning paste. The change of the colour in darker over the period of time is a characteristic of the product.

The concrete tops are finished with protective coatings, that never make the surface impervious, but are useful to slow down absorption of liquids. Cleaning: use water and a neutral detergent on the surface. Avoid direct contact with aggressive chemicals substances, solvents, ammonia, inks, oily soaps, lemon, wine, coffee. In case of contact, rinse the surface immediately and thoroughly.

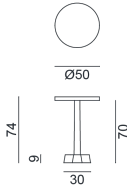

Concrete: Tops made from a mixture of cement, polyurethane resin and glass fibre
