## INOUT / ROUND TABLE, Paola Navone

Family of round tables with central base in crackle-finish cement, manufactured using a cement mix with high mechanical resistance. The surface is treated with waterproof resins, which are also resistant to light, UV rays, liquids, grease, oil and abrasion. Inout 837/838 stand out for their minimalism: available in two heights, with top resting directly on the base or slightly raised, they have an asymmetrical totem structure, with top in white Carrara marble, to give life to products of sophisticated minimalism.

The tops are finished with protective coatings, that never make the surface impervious, but are useful to slow down absorption of liquids. Cleaning: use water and a neutral detergent on the surface. Avoid direct contact with aggressive chemicals substances, solvents, ammonia, inks, oily soaps, lemon, wine, coffee. In case of contact, rinse the surface immediately and thoroughly. Marmo bianco Carrara: Materiale naturalmente compatto, resistente all' usura e idoneo al contatto con gli alimenti è trattato con impregnante protettivo trasparente opaco. La presenza di micro-fori o imperfezioni è da considerarsi una caratteristica intrinseca del prodotto naturale non suscettibile di reclamo. Crackle concrete finish: This finish recalls the craquelure that appears on materials over time. The effect is obtained by overlapping multiple layers of paint, among with a reagent is spread, which lifts up

partially the uppermost layer, bringing the underlying layer into view. The craquelure effect is obtained after the cement is dried and cooked. It is always different and makes each base a unique piece.
